

Zeat Seat

Brought to you by

alivat

The Zeat Seat is a modular seating solution for indoor activities for children with special needs, that need that extra support. Activities that can seem a challenge become a breeze with the Zeat Seat in the home. Whether that be tea time, play time, or learning/therapy time, this seat has you covered.

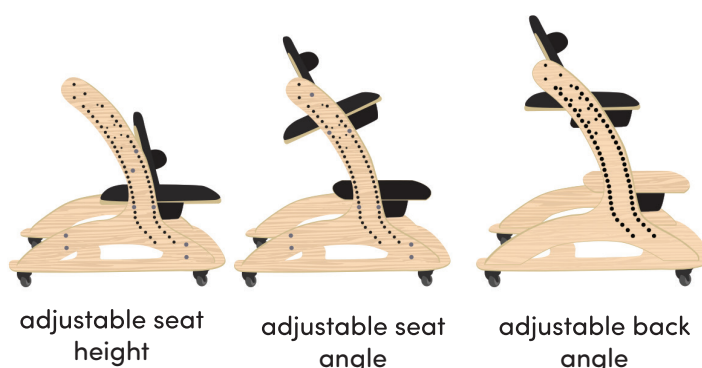

NOT YOUR AVERAGE SPECIAL NEEDS SEAT

We are in a world where everyone wants to fit in, yet so much special needs equipment can look clunky and screams "disability equipment". However with the Zeat seat constructed with durable hardwood, then covered in black maxi film and coated in a clear satin finish. It will fit into your everyday furniture and won't stand out as something different. It truly looks great in any home or school environment.

ADJUSTABILITY

The Zeat seat is extremely adjustable. This means that it can be used for a variety of activities, and suits a wide range of clients.

- Backrest angle adjustable
- Seat angle adjustable
- Adjustable seat height (seat can be set low to the floor)
- Don't need all the support? easily take away the laterals..and whatever you don't need.

GROWTH

Children grow we all know that. Having to continually upgrade equipment because of growth spurts can be frustrating. However with the Zeat seat you are sorted from 6 months until your child is an adolescent! There is huge growth adjustment range in the Zeat seat, which is easily adjusted with using only an allen key. So no calling out a tech to grow the seat, you can do it all yourself as easy as that.

WIPE DOWN

The Zeat seat upholstery is made out of soft touch dartex which is easily wiped down. So perfect for dinner time. The activity tray is also easily wiped down.

WHAT MAKES A ZEAT SEAT

- Seat frame, and footplate
- Seat and padded seat cushion
- Padded backrest
- Padded lateral supports
- Adjustable chest strap
- Activity tray
- Wheely base
