

Lori Stander

The **Lori Standing Frame**, a remarkable innovation in assistive technology that empowers individuals with mobility challenges to experience the benefits of standing. Designed with comfort, convenience, and functionality in mind, the Lori Standing Frame opens up a world of possibilities for users, promoting health, independence, and an enhanced quality of life.

The Lori Standers allows the client to stand in prone or supine as well as lying position. Lori features a new abduction system with anatomical abduction in the hip joint.

BENEFITS

- Adjustable Height and Support:** The frame offers adjustable height settings, accommodating individuals of various heights and specific needs.
- Smooth and Controlled Standing Transitions:** The Lori Standing Frame incorporates a user-friendly mechanism that allows for smooth and controlled transitions between sitting and standing positions.
- Customisable Options:** Personalization is key to meeting individual requirements.
- Ease of Use and Portability:** The frame is designed to be user-friendly and easy to operate. It can be easily maneuvered and transported, thanks to its lightweight and foldable construction.
- Durability and Safety:** Lori Standing Frame is built to last, utilising high-quality materials and construction.
