

SIMON CAR SEAT

Brought to you by

alivat

The Simon car seat is specially designed for children that need extra support and comfort while traveling, with highly adjustable trunk, pelvic, and head supports to ensure their safety and security.

The Simon car seat is made with a focus on safety, comfort, and ease of use. It comes with various safety features such as adjustable headrest and side impact protection, which provides extra protection to the child. The car seats are also equipped with the ISOFIX mounting system, which ensures that the seat is properly installed in the car and reduces the risk of incorrect installation.

BUILT IN SPEAKERS

"SOUND" system - built-in loudspeakers in the headrest of the seat, enabling the connection of a device with music dedicated to the child.

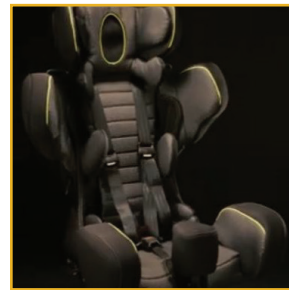

SWIVEL

Swivel base system makes getting the child in and out of the car seat a breeze.

TILT

Unique and one of a kind integrated with the base, adjustable seat bucket system (Tilt)

GROWTH

Has a large growth range, suiting children from 100-150cm tall

TRAY

Activity tray for extra upper body support, and allows the child to do activities while seated.

SUPPORT

Fully adjustable added head, trunk, hip, and thigh support ensure the safety and comfort at all times

WIPE DOWN
